

SYNTHETIC BLADE

METAL FRAME WIPERS

All – Season Performance

Steel Frame for
Heavy Duty Performance

Smooth, Quiet &
Chatter-Free Operation

Fast & Easy Installation with
Universal Base Connector

Accurate & Even Pressure Distribution

- High quality blade with precise wiping edge for cleaner windshields in all weather conditions
- Engineered with premium synthetic rubber molded to exact specifications and top quality standards
- Strong rust-free steel frame for rugged, heavy duty performance
- Durable & Corrosion resistant finish
- Synthetic elastomers resist aging from sun and improve durability
- Stainless steel rivets on all bridges for superior strength and longer life
- Aerodynamic design ensures even wiping action and reduces chatter and streaking
- Graphite coated squeegee edge provides a smooth and quiet wiping action across the windshield
- Twin-rail stainless steel spline distributes pressure on both curved and flat windshields
- Perforated center bracket prevents blades from lifting off the windshield even in strong winds or at high speeds
- Fast, easy and technician friendly installation
